Our current ArcIMS *All Coal* application

Soon for public release, WVGES new *All Coal* ArcGIS Server Flex Interactive Map

The map shows all coal mining in WV: auger, highwall, surface and underground mining

Tool: The user has the ability to choose and zoom to a particular county view

Tools: Ability to choose one of four basemaps and choose transparency levels for major layers.

Tool: Input an address, find and zoom to location.

Enhanced Search Tool: Place a dot on a feature and get information on it.

Feature will be highlighted; pop-up box provided with attribute information along with hyperlinks for more detailed information.

Enhanced Search Tool: One can also choose several features by drawing a polygon around them

Data Extraction Tool: The selection is similar to the Enhanced Search Tool. One can choose
To download shapefiles, file geodatabase, CADD files in a "zipped" package.

Open the file in your software. Here the downloaded and unzipped shapefile set is being opened in the freely available *ArcGIS Explorer.*

A user's selection displayed in *ArcGIS Explorer* (right).
The selection from the All Coal Map (left)

A geology layer is available as well!
